# Do you always **remember** to **charge** your Power bank?

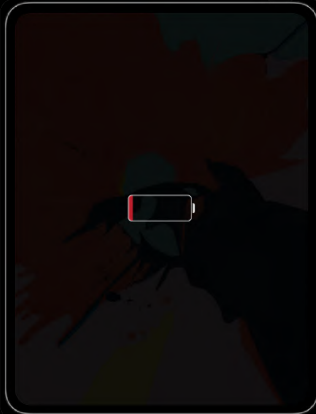

Research and analysis on over 1000 users highlight a common behavior: once at home, people need to recharge phones, tablets and other devices, often **forgetting to recharge powerbanks.**

Night recharge

1.45 h

2.5 h

Mostly forgotten to be recharged

# The **powerbank** you will **actually use!**

Portable devices have a common problem: they **run out of battery** when we most need them.

Since today's power banks are **too bulky** to be carried in our pockets everyday, we are always left with dead battery.

**TAU** is a must-have **emergency power bank** that will **always** stay onto your keychain.

# Integrated cables

Thanks to integrated **Lightning**, **MicroUSB** and **Type-C** connectors, TAU can charge any portable device.

It's the **smallest 3in1** Power bank in the **world**.

**USB-C**

**DUAL**

(iPhone + MicroUSB)

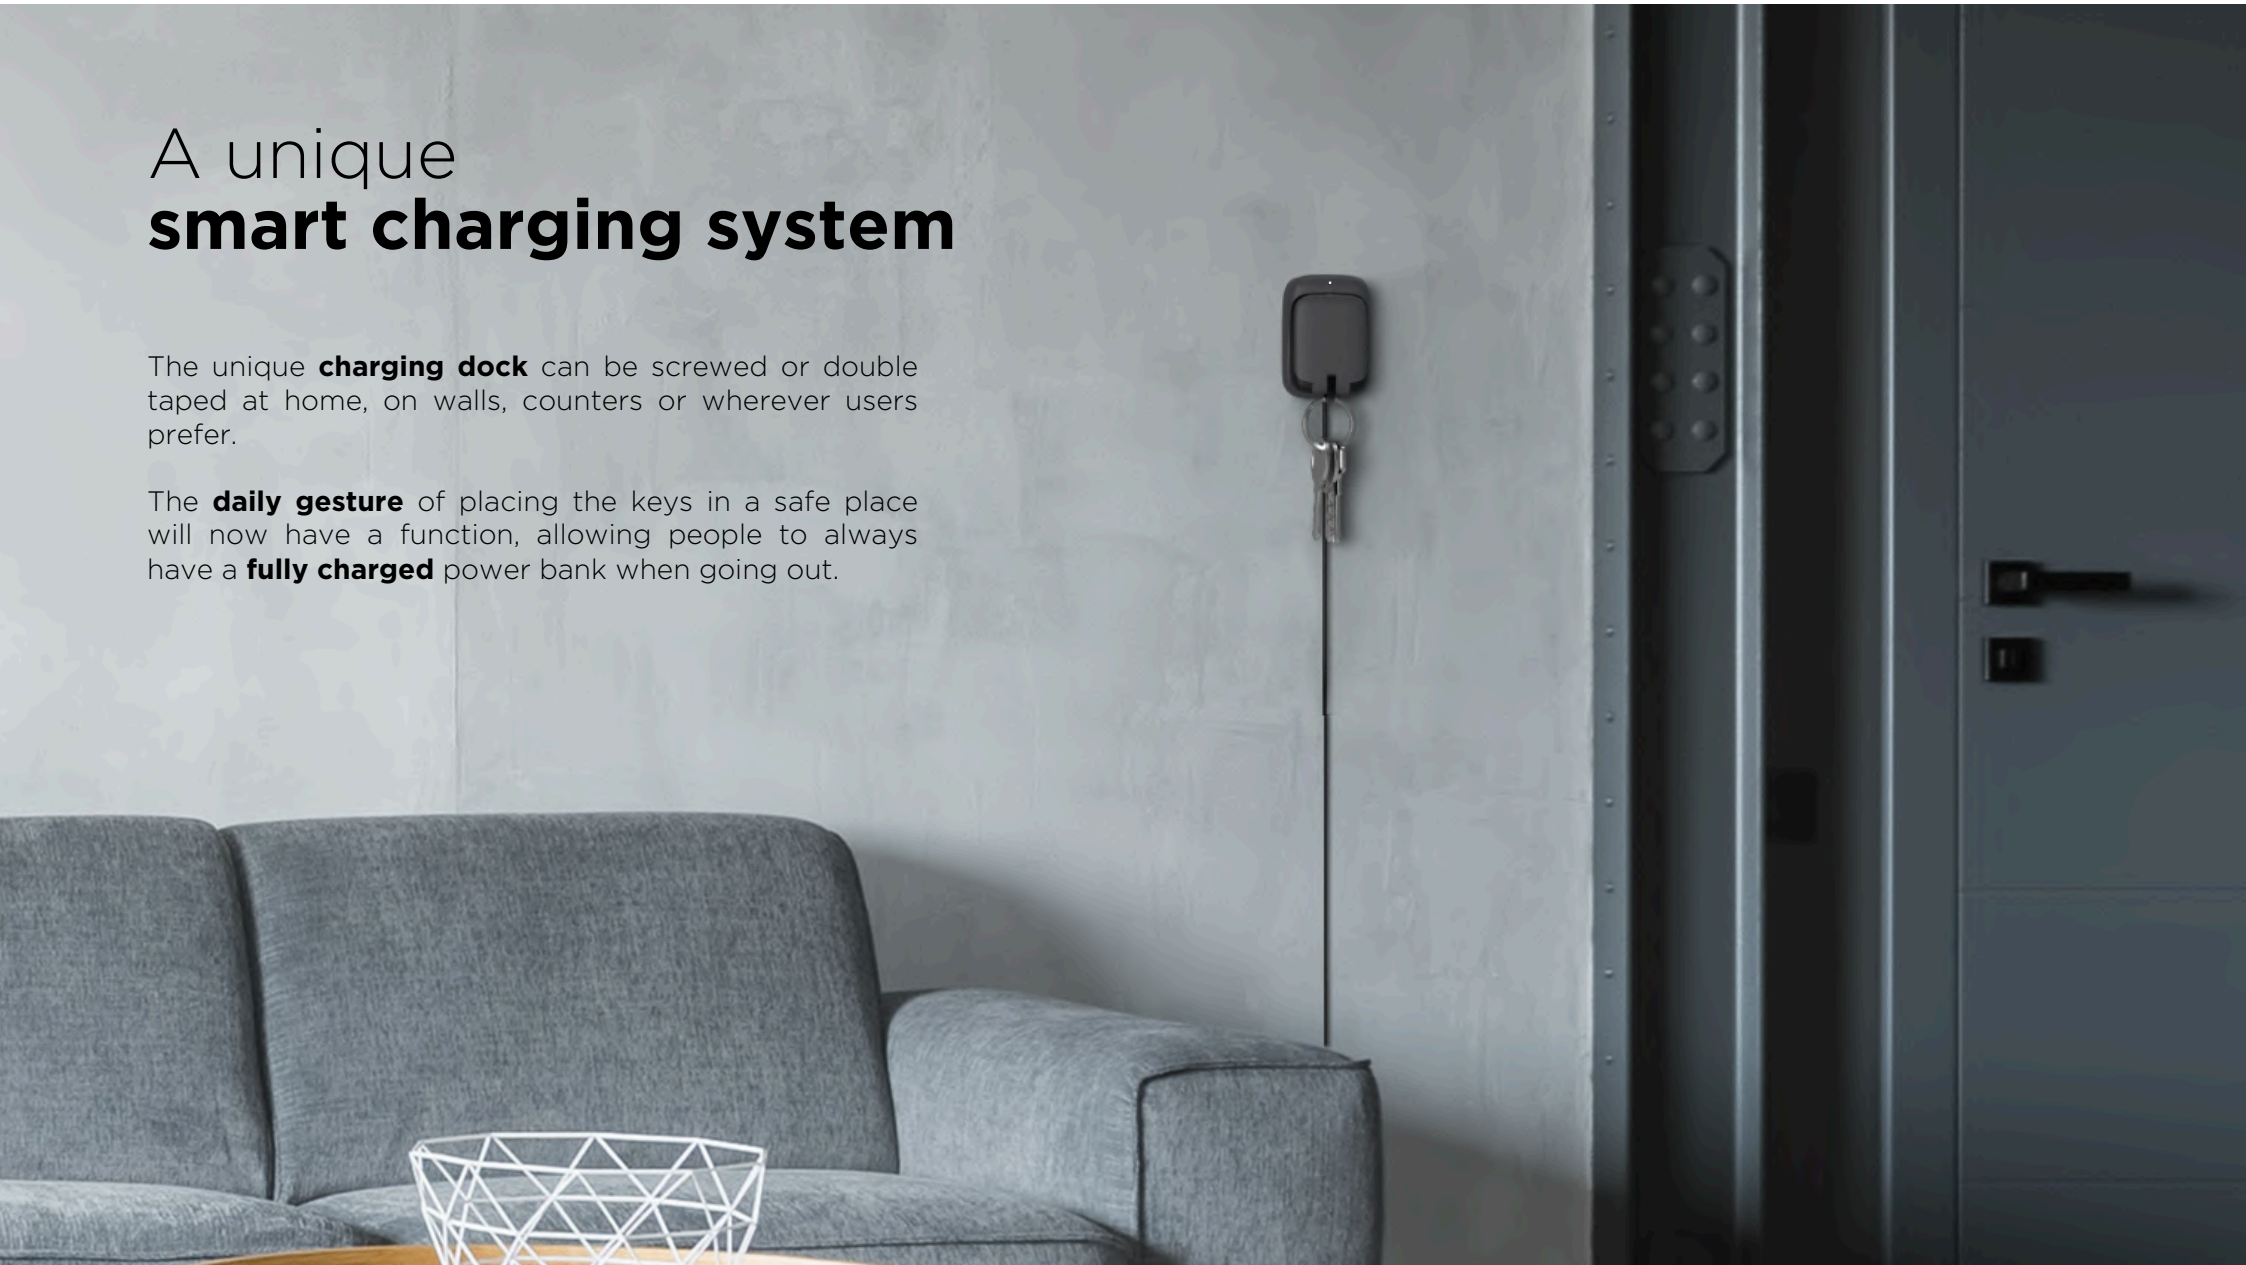

# A unique **smart charging system**

The unique **charging dock** can be screwed or double taped at home, on walls, counters or wherever users prefer.

The **daily gesture** of placing the keys in a safe place will now have a function, allowing people to always have a **fully charged** power bank when going out.

# Smart charging dock

Tau is the **first power bank** that users don't have to **remember to recharge**.

Once back home, TAU will be recharged by simply placing your set of keys on its charging dock.

We have found the **optimal balance** between power and portability:  
**1400 mAh** capacity packed into an incredibly compact **45x60x14 mm**.

That's what makes TAU the perfect **emergency power bank**: always charged, always with you.

Magnetic charging pins

Easy opening metallic hook

Dock wall mount  
(screws / double tape)
